

Sample Title* (Invited Talk)

Roussanka Loukanova

Institute of Mathematics and Informatics, Bulgarian Academy of Sciences, Bulgaria
xy@uni-z.countrycode

A formal subject of math of computations, which I am still in love with, since my master's education, has been turning into a good prose-like story by [2]. The book [3] remains my favourite of all time.

One of the great tasks in front of logic and algorithms is the translation between mathematical proofs written in human language, e.g., by good prose-like texts, and proofs expressed in specific formal languages.

The sample references [1], [3,2] provide some bibliography examples.

For the bibliography references, with L^AT_EX use BibTeX with Springer bibliography style for Math and CompSci:

```
\bibliographystyle{spmpsci}
```

References

1. Chomsky, N.: Syntactic Structures. The Hague: Mouton (1957)
2. Hopcroft, J.E., Motwani, R., Ullman, J.D.: Introduction to Automata Theory, Languages, and Computation. Addison-Wesley Longman Publishing Co., Inc., Boston, MA, USA (2006)
3. Hopcroft, J.E., Ullman, J.D.: Introduction to automata theory, languages, and computation (1979)

Short Biography As about me, Roussanka, the two cover pictures of the book [3], taken together, actually depict my own life, as of now. But, the life journey of theory & applications of computation continues ahead.

For keynote and invited speakers:

- the pdf of the abstract should include your short bio
- about 100 words
- after the References
- marked by paragraph heading: *Short Biography*
- make sure that it includes your name in some distinctive way, at the beginning

* Supported by organization x.
