Yes. In a functioning democracy, Trump is threatening his jury. In our current form of government, Trump is just “being Trump.”

GoFigure

Syllogistic figuration

Epanalepsis

The cooccurrence of one or more words at the beginning and ending of the same phrase or clause ; promote semantic features; kill an argument.

Instances

Hilary lost because she was Hilary. (@ReaganWorld 2017)

Harsh realities are harsh realities. (@peterdaou 2016)

Trump is just being trump. (@betdor 2017 / doxa)

[H]e's an asshole being an asshole. (@betdor 2017)

The facts are the facts. (doxa)

Business is business. (doxa)

A deal is a deal. (doxa)

The law is the law. (doxa)

Boys will be boys. (doxa)

Epanalepsis

Antimetabole

The cooccurrence of at least two words, first in one order, then in the opposite order; reciprocal force.

Instances

All for one, one for all / Tous pour un, un pour tous. (Dumas 1849)

[A]sk not what your country can do for you—ask what you can do for your country. (Kennedy [& Sorensen] 1961)

Women are changing the universities and the universities are changing women. (Greer 1988, 629)

[W]hen you look into the abyss, the abyss also looks into you. / [W]enn du lange in einen Abgrund blickst, blickt der Abgrund auch in dich hinein. (Nietzsche 1899, 105)

[Y]ou can communicate with your pet dog, and your pet dog can communicate with you. (Chomsky 2013)

A place for everything and everything in its place. (doxa)

Antimetabole and its friends

Antimetabole (reverse lexical repetition)

All for one, one for all

Mesodiplosis (medial lexical repetition)

All for one, one for all

Anadiplosis (lexical repetition directly across phrasal or clausal boundaries)

All for one, one for all

Epanalepsis (lexical repetition at the beginning and ending of a phrase or clause)

All for one, one for all

Parison (repetition of syntactic structure)

[N [P [N]_{NP}]_{PP}]_{NP} [N [P [N]_{NP}]_{PP}]_{NP}

Isocolon (repetition of prosodic contour and/or syllable structure)

ól fór wén wén fór ól

Antimetabole and its friends

Antimetabole (reverse lexical repetition)

All for one, one for all

Mesodiplosis (medial lexical repetition)

All for one, one for all

All for one, one after all

Anadiplosis (lexical repetition directly across phrasal or clausal boundaries)

All for one, one for all

Epanalepsis (lexical repetition at the beginning and ending of a phrase or clause)

All for one, one for all

Parison (repetition of syntactic structure)

[N [P [N]_{NP}]_{PP}]_{NP} [N [P [N]_{NP}]_{PP}]_{NP}

All for one; one, all for

Isocolon (repetition of prosodic contour and/or syllable structure)

ól fór wén wén fór ól

Antimetabole, friendless

Antimetabole without Mesodiplosis, Parison, Anadiplosis, Epanalepsis, or Isocolon

all in the service of **one**, at the same time as **one** serves the interests and success of **all**, if you know what I mean.

Dubremetz & Nivre (2018)

Rhetorical figure detection: Chiasmus [Antimetabole], epanaphora, epiphora. *Frontiers in Digital Humanities* 5

“a book consisting of 150,000 words, with 66,000 examples of criss-cross patterns but only one real chiasmus”

“chiasmus ... can be seen as a graded phenomenon with prototypical examples and controversial/borderline cases.”

“not be a binary classification task”

“a chiasmus detector should extract criss-cross patterns and rank them from prototypical chiasmi to less and less likely instances”

Dubremetz & Nivre (2018)

Rhetorical figure detection: Chiasmus [Antimetabole], epanaphora, epiphora. *Frontiers in Digital Humanities* 5

#1 There are only two kinds of men: the righteous who think they are sinners and the sinners who think they are righteous.

#3000 You hear about constitutional rights, free speech and the free press. Every time I hear these words I say to myself, 'That man is a Red, that man is a Communist!'

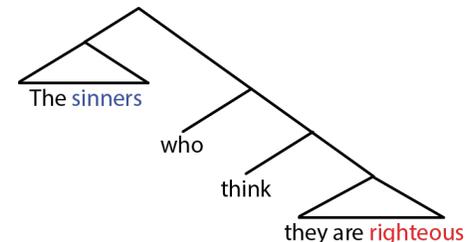

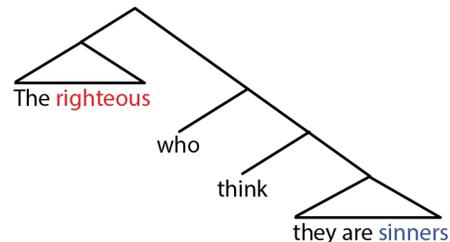

Dubremetz & Nivre (2018)

Rhetorical figure detection: Chiasmus [Antimetabole], epanaphora, epiphora. *Frontiers in Digital Humanities* 5

The good news

- High reliability
- Figure detection

The less

- They
- They

The great news

- They have laid the foundation

antimetabole
(an tee muh TAH boh lee)

figure of speech in which two or more words are repeated in a successive clause, but in reverse order
a type of chiasmus

Examples:
 "All for one, and one for all." (The Three Musketeers, Alexandre Dumas)
 "Absence of evidence is not evidence of absence." (The Demon-Haunted World, Carl Sagan)

tion is

Dubremetz & Nivre (2018)

A serious bottleneck in the creation of a system for ranking chiasmus candidates is the lack of annotated data. [Antimetabole] is not a frequent rhetorical figure. Such rareness is the first reason why there is no huge corpus of annotated [antimetboles]. It would require annotators to read millions of words in order to arrive at a decent sample.

Another difficulty comes from the requirement for qualified annotators when it comes to literature-specific devices.

[Antimetabole], epanaphora,

action is

Confession: I lied about epanalepsis

love is love
done is done
enough is enough
war is war

I said what I said
dog eat dog
a lie begets a lie
nothing will come of nothing.

“dicks who go out of their way to let the world know they’re dicks.”
(@KBAndersen)

“A Canadian is a Canadian is a Canadian.” (Trudeau 2015)

“Corporations aren’t people. People are people.” (Obama 2012)

“[A] dark Satanic mill ought to look like a dark Satanic mill and not like a temple of mysterious and splendid gods.” (Huxley, qtd in Orwell)

“In times like these, it is helpful to remember that there have always been times like these.” (Harvey, n.d.)

Confession: I lied about antimetabole

Equum versus lapidem, ac lapidem versus equum

If you press a **stone** with your **finger**, the **finger** is also pressed by the **stone**. If a horse draws a stone tied to a rope, the horse (if I may so say) will be equally drawn back towards the stone: for the distended rope, by the same endeavour to relax or unbend itself, will draw **the horse** as much towards **the stone** as it does **the stone** towards **the horse**. (Newton, 1803/1687, 1.15)

[A]sk not what **your country** can do for **you**—ask what **you** can do for **your country**. (Kennedy [& Sorensen] 1961)

Thus the expression “**men** and **women**” is, conventional meanings set aside, equivalent with the expression “**women** and **men**.” (Boole 1854, 23)

$x + y = y + x$; $xy = yx$; $p \ \& \ q \rightarrow q \ \& \ p$; $p \ \vee \ q \rightarrow q \ \vee \ p$

The reason women are critiqued for being too loud or too meek, too big or too small, too **smart** to be **attractive**, too **attractive** to be **smart** is to belittle women out of standing up publicly. The goal is to critique into submission. (@AOC 2019)

Whether we bring our **enemies** to **justice** or bring **justice** to our **enemies**, justice will be done. (Bush [& Gerson] 2001).

Confession: I lied about antimetabole

[L]a vie c'est le germe et le germe c'est la vie. / [L]ife is the germ and the germ is life.
(Pasteur 1886/1883, 33)

$$P \rightarrow Q \ \& \ Q \rightarrow P$$

In America, race is class and class is race. (Darnell Hunt, qtd on *Sunday Edition* 2014)

$$P \leftrightarrow Q$$

Hamas is ISIS and ISIS is Hamas. (Netanjahu 2014)

Gay rights are human rights, and human rights are gay rights. (Clinton 2013, 0:08-0:12)

Ultrabooks are laptops after all, but not all laptops are ultrabooks. / In essence, Ultrabooks are just a special type of laptops. (Ultrabooks vs Laptops 2013)

$$P \rightarrow Q \ \& \ \sim Q \rightarrow P$$

All compounds are molecules ... but not all molecules are compounds (Volpe 1975, 7)

The morals of these stories

The rhetorical functions are a product

- Collocation
- Interaction with grammatical features (lexical type, phrase structure, ...)

Corpus research is needed to

- Test the sorts of claims I've been making here
- Discover new collocation / interaction rhetorical functions

But there's a bottleneck

- We need tons of annotated instances
- Trained annotators

The Rhetoricon
